EDUCATION

- **University of Florence** 09/2022-04/2026
Master's Degree in Electronics for radiofrequency applications 110/110
- **University of Florence** 09/2017-02/2022
Bachelor Degree in Electronics and Telecommunications
- **I.I.S Leonardo Da Vinci** 2013-2017
Electronics

PROFESSIONAL EXPERIENCE

- **IHP Microelectronics** 05/2025-10/2025
RF Circuit Designer – Trainee Frankfurt (Oder), Germany
 - Designed a D-Band (110–170 GHz) active balun in 130 nm SiGe BiCMOS technology.
 - Researched the state of the art of active baluns and designed circuit topologies for D-band operation.
 - Simulated and optimized amplitude balance, phase balance, gain, and power consumption.
 - Prepared and optimized the integrated layout for tape-out submission.
 - Prepared the measurement plan and analyzed S-parameters from .CSV files using MATLAB.
 - **Tools used:** Cadence Virtuoso, ADS, MATLAB, LaTeX, PowerPoint.

ACADEMIC PROJECTS

- **VHDL for Real-Time Reconfiguration of the Operating Frequency of a PLL in an FPGA** 02/2022
Design and simulation of a VHDL-based digital control system for FPGA applications. Florence, Italy
 - Designed VHDL modules for real-time control of the PLL operating frequency.
 - Simulated and verified the design using ModelSim.
 - Implemented and tested the project using Intel Quartus on an FPGA development board.
 - **Tools used:** Intel Quartus, ModelSim, PowerPoint.

TECHNICAL SKILLS AND INTERESTS

Programming Languages: MATLAB, C

EDA and Simulation Tools: ADS, Cadence Virtuoso, LTspice

Technical Skills: Analog Circuit Design, RF/mm-Wave Circuit Design, S-Parameter Analysis, IC Layout

Documentation Tools: LaTeX, PowerPoint

Areas of Interest: Analog Circuit Design, RF/mm-Wave Circuit Design, Integrated Circuits (IC), RFIC Design

LANGUAGES

Italian: Fluent

English: Excellent reading, good written and spoken communication

Albanian: Basic spoken communication
